

# Performance Evaluation of Free Space Optical Communications

Amr El-Wakeel, Nazmi Azzam, Moustafa Aly

Free Space Optical (FSO) communications has received a great interest in recent years as a solution of some challenges facing fiber optic communications and wireless communications. Transmitters and receivers design, investigating pointing errors, effect of environmental phenomena, link budget, availability and bit error rate (BER) are some of the important research points required to investigate, analyze and evaluate the performance of an FSO link.
