

# Periodicals Circulation Statistics at a Mid-Sized Academic Library : Implications for Collection Management

John A. Whisler

The results of this study have implications for collection management at most academic libraries. Providing an indication of the relative use of journals in an average academic library, this book will be helpful to serials and collection development librarians who must decide to which titles their library will subscribe and how those titles will be maintained in their collections. The circulation patterns found in this study have far-reaching significance because of the nearly complete measurement of the use of unbound periodicals in all subjects, the long duration of this study, and the very average profile of the academic institution and its library.
